Volumetric Video as a Novel Medium for Creative Storytelling

Gareth W. Young, Néill O'Dwyer, and Aljosa Smolic

Volumetric Video as a Novel Medium for Creative Storytelling

- **Introduction:**

- Volumetric video (VV) as a novel media capture technique

- **Public-facing cultural applications within the creative technology domain**

- Creative Experiments
 - Example use-cases and real-world context for VV in practice

- **Successes and shortcomings**

- New challenges that demand a redesigning of a storytelling grammar

Introduction

Volumetric video (VV) as a novel media capture technique

- **3D Capture and Playback**
 - As kinetic content (people, animals, objects in motion, etc.) using live-action video techniques
- **Vision Capture Technologies**
 - With infrared, RGB video, and LIDAR cameras
- **Dynamic 3D visual media**
 - Can be viewed across various platforms

Volumetric Video as a Novel Medium for Creative Storytelling

Volumetric Video as a Novel Medium for Creative Storytelling

Stage 1

- 12 Cameras
- One continuous take
- Green Screen
- Live performance

Stage 2

- Video synchronization
- Editing
- Color correction
- Chroma keying

Stage 3

- VV processing
- 3D output
- Texturing

Stage 4

- Game engine
- Scenography
- Platform selection

Stage 1: Volumetric Video Capture Studio

Stages 2&3: Editing and 3D Reconstruction

Stage 4: Scenography and Platform
